

PS21-2103 Component 2 Combined Evaluation and Work Plan Template

This template is provided as an aid to applicants in preparing the evaluation and work plan for PS21-2103; however, its use is optional.

1. Space is provided for brief narrative descriptions of the 5-year plan and Year 1 plan for each strategy, with a suggested limit of 100 words each.
2. The title and sections headers in this file are formatted to support accessibility of the document online.
3. Applicants may change all text to any 12-point font single spaced to meet requirements stated in the NOFO.
4. Text in green can be deleted to reduce the length.

The tables in this template include only the required short-term activities and expected (bolded) outcomes from the PS21-2103 Logic Model.

1. Short-term activities listed in this template are required and should not be edited.
2. Short term outcomes may be achieved during Years 1–3 of funding; applicants should review and edit these outcomes as needed to indicate what outcomes are expected to be achieved in Year 1.
3. Applicants planning to address the intermediate expected (bolded) or remaining (non-bolded) short- or intermediate-term activities/outcomes in Year 1 may copy sections of the template and edit them accordingly.
4. Example process measures (example: not required) are shown for required short-term activities with no required process measure in the evaluation and performance section of the NOFO.

Component 2: Core Viral Hepatitis Prevention Activities

Strategy 2.1: Support viral hepatitis elimination planning and surveillance and maximize access to testing, treatment, and prevention

Outcome 2.1.1: Increased state engagement with key stakeholders in viral hepatitis elimination planning

Outcome 2.1.2: Increased commercial and hospital-based laboratories conducting HCV RNA reflex testing

Outcome 2.1.3: Increased HCV and/or HBV testing in health-care systems

Strategy 2.2.: Increase access to HCV and/or HBV testing and referral to care in high-impact settings

Outcome 2.2.2: Increase awareness of infection status among people diagnosed with chronic hepatitis C and/or hepatitis B

Outcome 2.2.3: Increased referral to treatment for people living with hepatitis C and/or hepatitis B

Strategy 2.3.: Improve access to services preventing viral hepatitis and other bloodborne infections among PWID

Outcome 2.3.1: Increased utilization of SSPs among PWID

Outcome 2.3.2 (numbered 2.3.1 in the NOFO): Increased referral of PWID to SUD treatment

Outcome 2.3.3: Increased receipt of hepatitis A and hepatitis B vaccination among clients in high-impact settings
